

Walter Grooving

Tools and geometries covering all machining operations

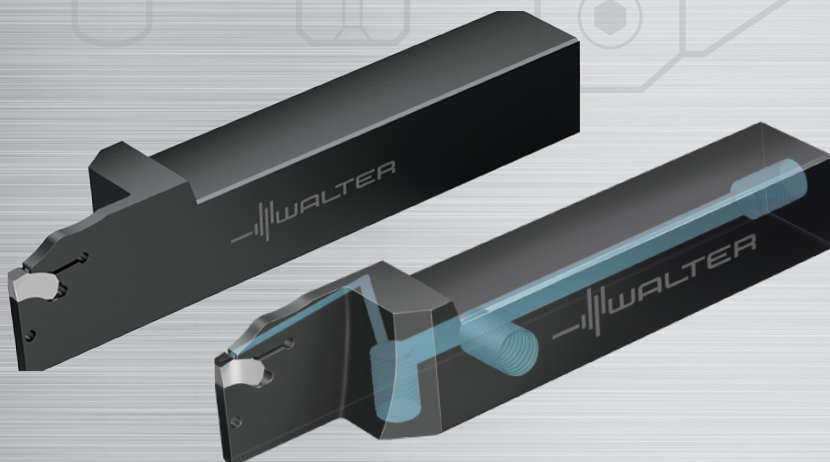

Promotion from October 1st through December 31st 2019

- Multiple solutions for cutting and grooving projects
- Deep parting blades, parting off up to a diameter of 7.87"
- Efficient grooving in aluminum and titanium alloys
- High cutting speeds and long tool life
- Straight and full-radius grooving inserts

Single-edged SX system

- Deep grooving and parting off with internal coolant
- Can be used on all types of lathes

PROMOTION:

Buy 10 inserts get a free non-coolant through holder!

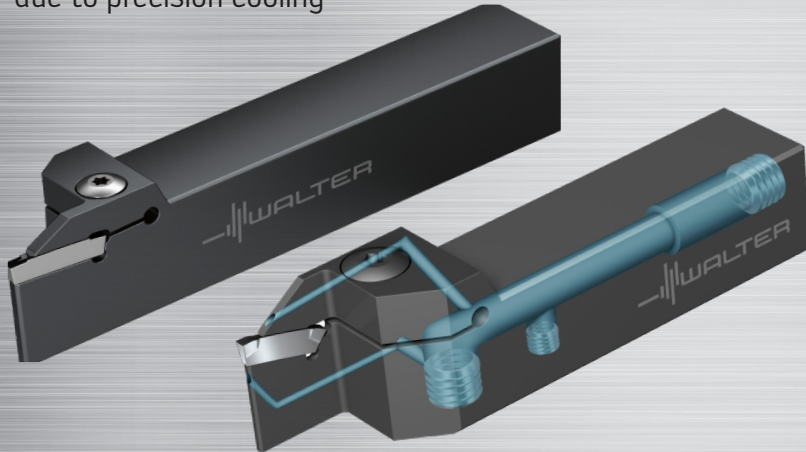

Buy 20 inserts get a free coolant through holder!

Walter competence brands

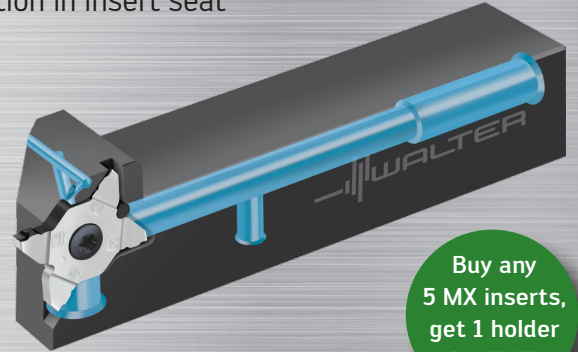

2-edged GX system

- Short chips, therefore no downtime for removing chip accumulation
- High quality surface finish and flatness due to precision cooling

4-edged MX system

- Tangential arrangement enables outstanding flatness and surface quality
- Very user friendly due to self-aligning tangential clamping
- Maximum indexing accuracy thanks to dowel pin location in insert seat

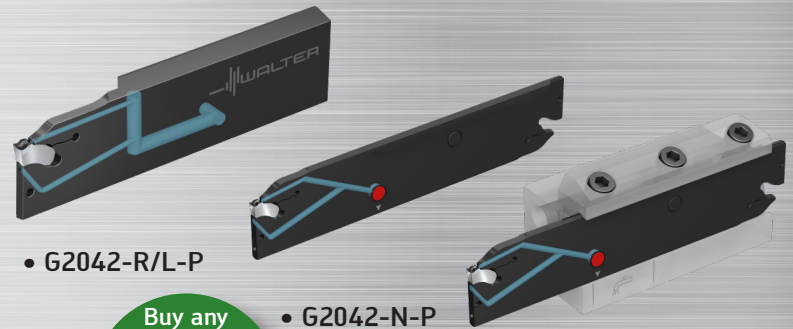

Buy any
5 MX inserts,
get 1 holder
for FREE

PROMOTION:

Buy 10 inserts get a
free non-coolant
through holder!

Buy 20 inserts get a
free coolant
through holder!

• G2042-R/L-P

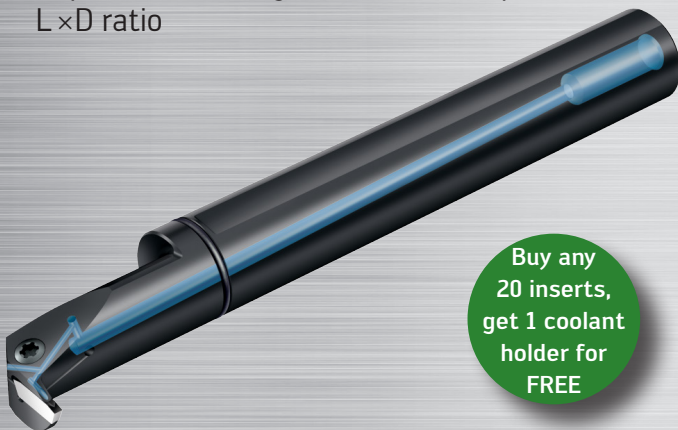

• G2042-N-P

• G2661-P

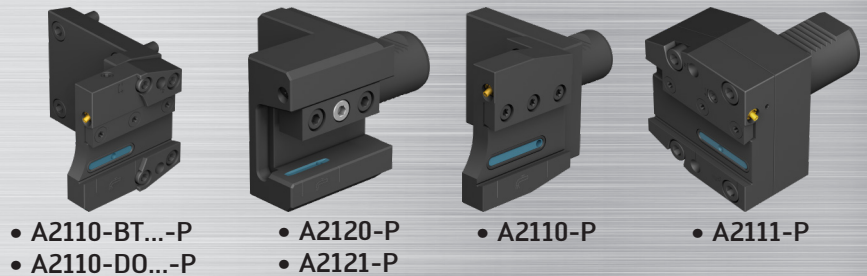

Buy any
40 SX inserts,
get 1 blade
and G2661-P
holder FREE

Internal grooving boring bar

- Interface between base adaptor and tool free from pressure loss due to O-ring seal
- Optimal surface quality, process reliability and chip evacuation
- Superior machining results due to optimal LxD ratio

Buy any
20 inserts,
get 1 coolant
holder for
FREE
